## **Statement on the REACH regulation**

With regard to **the European Regulation (EC) 1907/2006 concerning Registration, Evaluation, Authorization and Chemicals (REACH)**, Anland Electronics here by confirms that we supply articles (not chemicals) which are not intended to release any substances under normal conditions of use.

The articles we produce don't contain any substances in REACH regulation Annex XIV nor Annex XVII, and we carefully observe the SVHC (Substances of Very High Concern) in order to avoid using listed substances.

Our intention is to replace any substance, in the articles we produce, that are and will be listed on the SVHC list with a suitable one. We are fully aware of our duties according to article 33.1 and will inform our professional users if we have a substance listed on the SVHC list in the articles we produce and if the concentration value is higher than 0,1 %.

Anland Electronic always complies with current legislations within the geographical markets we are subjected to, and we always try to avoid use of hazardous substances both in the articles and production processes.

Yours sincerely

**ANGLAND ELECTRONICS AB**

Pontus Anland  
Managing Director
